- **Tunisia's Central Bank targets inflation but may hurt growth prospects**

The Central Bank of Tunisia tightened its monetary policy in an attempt to control inflation, a move that risks complicating the government's efforts to spur economic recovery and deliver requested reforms. Tunisian economists said the bank's interest rate increase could backfire, arguing that higher inflation rates were the result of the increase in non-essential imports. They said soaring import bills widened the current account deficit and weakened the Tunisian dinar, causing a rise in prices while the country's foreign currency reserves were shrinking.
